About

Tech. lead with 2 years experienece with a team of six Full Stack developers including myself. I've been developing in JS / TS with React and NodeJS for over 5 years. I have worked with C++ and C# for about three years. Today I learn Rust / DevOps / ML. My requests is comfortable chair and a Mac Book Pro. Focused on the business and its goals. I appreciate openness, honesty and creativity in my work. I practice: TOC, Agile, Scrum, Lean, XP, Kaizen. My code, project style and all automation can be viewed on the github. Not ready to work with conflicting people. In free time I read books, investing, communicate with friends, launch mini startups, skiing. I'am interested of philosophy particulary stoicism. Sometimes I like to cook delicious meals.
